

# Project Management Office Services

Structure, transparency, and control

Paxon's PMO Services provide the structure, visibility, and cost discipline needed to deliver complex energy and utility capital programs. From planning through closeout, our teams help clients manage scope, mitigate risk, and make confident decisions backed by real-time data. We scale from single-project support to enterprise-wide portfolio management.

## What we deliver

### Planning and controls

Schedule development, capital project planning, cost estimating, resource allocation, and critical path analysis to establish baseline discipline from day one.

### Field-integrated perspective

Our project controls teams work alongside field operations and combine program discipline with real-world constructability insight.

### Continuous improvement

Structured lessons-learned processes, procurement support, and performance benchmarking that improve outcomes across every phase of the program.

## How we differentiate

### Risk management

Risk identification, assessment, and mitigation planning reduce uncertainty and protect project outcomes.

### Stakeholder confidence

Governance structures, regular reporting cadences, and communication that keep program stakeholders informed and accountable.

### Real-time program intelligence

Integrated dashboards and analytics that give clients and stakeholders visibility into cost, schedule, and risk in the program lifecycle.

### Scalable framework

Our PMO services scale from single-project support to enterprise-wide portfolio management across your organization.

# Proven results

## CASE STUDY: CALIFORNIA

### Digital system helps deliver \$4M in savings for operator

A utility improved field operations and asset management with a GenAI-enabled platform. The approach improved efficiency and reliability since 2022. Paxon's platform enables real-time tracking, streamlined workflows, and mobile access.

**Outcomes: Faster execution, proactive maintenance, and ~\$4M in annual savings.**
